

Advanced Mathematics  
Support Programme®

**Professional Development for  
teachers of Core Maths**

# What do we offer?

Whether you're interested in offering Core Maths or you're already teaching the subject, you can benefit from our range of professional development focused on Core Maths.

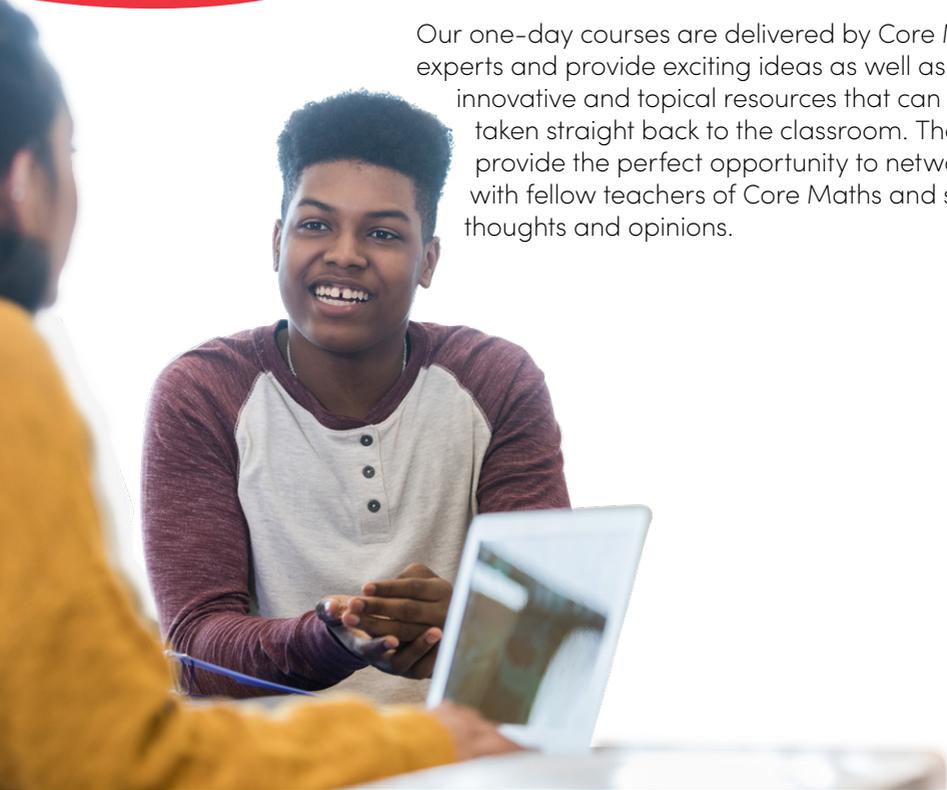

Our professional development courses include access to high-quality online teaching and learning resources, designed to support the content covered.

## Inspirational conferences for all Core Maths teachers.

Our one-day Core Maths conferences offer inspiration for all Core Maths teachers; whether you're experienced or new to the qualifications, you'll find sessions appropriate for you. You'll discover innovative resources, explore interesting and authentic ways to introduce Core Math topics in the classroom and reflect on the best ways to support students with topics they find challenging.

## Our courses offer support to develop your teaching of Core Maths

Our one-day courses are delivered by Core Maths experts and provide exciting ideas as well as innovative and topical resources that can be taken straight back to the classroom. They provide the perfect opportunity to network with fellow teachers of Core Maths and share thoughts and opinions.

The AMSP offers a wide range of online courses. Discover the options at [amsp.org.uk](http://amsp.org.uk).

## Support your students' application of mathematical skills within other subjects

Quantitative skills developed in Core Maths are enormously beneficial to other A level subjects such as Biology, Geography and Psychology. We offer conferences designed to support teachers of these and other subjects, focused on developing their own mathematical understanding and ideas to use in their own classrooms.

## Would you prefer a more flexible way to access professional development?

If you find it difficult to take time out of your regular commitments, the AMSP's innovative online courses are a great way to continue your professional development.

### **Live Online Professional Development (LOPD)**

courses offer the opportunity to join in the sessions from the comfort of your home or workplace. Live online sessions run after the end of the school day, and you can access support from a tutor and engage with fellow participants through our online classroom environment.

**Webinars** provide the opportunity to share ideas, concerns, challenges and successes with other teachers of Core Maths across the country.

! Our professional development courses are all **FREE** or available at low cost.

# Fees and subsidies

Through government funding, the AMSP is able to offer its professional development courses for free or at low cost.

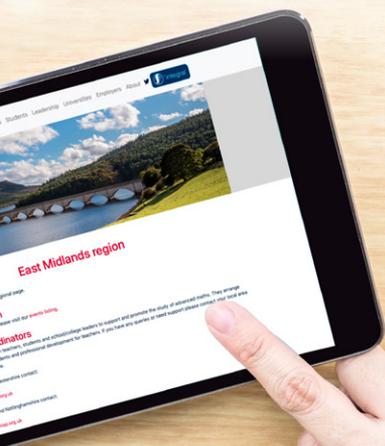

For several courses, generous subsidies allow state-funded schools and colleges to reclaim the fees on completion of the course. Schools and colleges in eligible locations are able to claim additional subsidies to facilitate.

For full details, visit [amsp.org.uk/subsidies](https://www.amsp.org.uk/subsidies).

## Would you like to find local support?

- The AMSP has more than 40 Area Coordinators throughout England, each working with schools and colleges in their area to provide a wide range of flexible professional development opportunities. Check the AMSP website for details of events in your area.
- The AMSP organises **Teacher Network Meetings** across the country. These networks focus on sharing good practice, encouraging professional growth and promoting developments in teaching and learning. Visit [amsp.org.uk/events/teacher-network-meetings](https://amsp.org.uk/events/teacher-network-meetings) to find your nearest teacher network.
- **Supporting Core Maths** Work Groups are offered in partnership by Maths Hubs and the AMSP. Each Work Group focuses on promoting the philosophy of Core Maths, with its approach to teaching maths through contextualised problem-solving. Every Maths Hub across the country offers this support.

## What is the AMSP?

The **Advanced Mathematics Support Programme (AMSP)** is a government-funded initiative that aims to increase participation and improve the teaching of 11-16 maths, Core Maths, AS/A level Mathematics and AS/A level Further Mathematics.

We offer:

- Free guidance on introducing and sustaining advanced maths options, including strategies for offering Core Maths and AS/A level Further Mathematics
- A wide range of free/low cost flexible professional development for:
  - Higher Tier GCSE Mathematics
  - Core Maths
  - AS/A level Mathematics and Further Mathematics
  - Supporting students with university maths admissions tests
- Free teaching and learning resources
- Free/low cost enrichment events and materials for students to encourage them to study maths beyond GCSE and to prepare for university mathematics admissions tests
